

SALAMANDER CREDENTIALING SYSTEM TRAINING ANNOUNCEMENT

Colorado Division of Homeland Security and Emergency Management

Course Description:

The first portion of the training day will cover the Salamander Live Version 2, a resource management tool developed and funded by the Colorado Division of Homeland Security and Emergency Management (DHSEM). This statewide solution gives all city, county, and state agencies the ability to credential personnel and equipment and produce the standardized ID card credential. This then allows for seamless interoperability across all city and county lines. The resource information is housed in the web-based "Salamander LIVE" system. As of today, there is over 26,000 people in this database across the state.

The second half of the day will focus on the Salamander "TRACK APP" (for smartphones and tablets) to conduct resource accountability. The Salamander "rapidTAG" incident specific badging system, Salamander "rapidTagEVAC" which focuses on evacuee identification and the Salamander "COMMAND" solution will also be covered.

Using "Salamander LIVE", this course will also cover the ability to gain greater situational awareness and generate incident specific reports (including NEW personnel and equipment COST REPORTS. INVENTORY Management will also be discussed.

It is recommended to bring a laptop computer, if you have one.

Target Audience:

Salamander Agency Administrators, Agency Data Entry Personnel, Agency Training Personnel, TrackApp Users, RapidTAG, Users, Command Users. Any other individuals who are potential system users in any form.
